

WHEAT FROM DE BOLT
The first load of wheat from east
the Smoky was delivered at
de Prairie on Tuesday, August

THE NORTHERN TRIBUNE

AN INDEPENDENT WEEKLY
NEWSPAPER
Published every Thursday at Grande
Prairie, Alberta.

Holder of Alberta "Better Newspapers"
Award for 1937.

The Tribune's aim is to thoroughly
"cover" the local news in a field with
no other local newspaper, and to
aid in the development of the Peace
River Country and help make known
this northern inland empire's many
advantages as a place to live. It is
printed without intentional distortion.
The paper's opinions are ex-
pressed only in its editorial columns.
Letters for publication are wel-
comed. A post office name must be
used. Correspondents must also sign their
names. Names are not necessarily used
for publication, but as evidence of good
faith in publishing a communication
the Tribune does not imply agree-
ment.

Subscription Rates:
One Year, in British Empire... \$1.50
One Year, in United States... 2.00
Legal and other advertising rates
furnished on application.

Dad's Notions

By E. S. Stanley

Awakened, finally, by the booming
of heaven's artillery, I sprang to the
window and lightning flashes re-
vealed an ominous sight that was
terrifying—the monster, in that
moment came a deathly calm, giving
evidence to the roar of the monster
now ready to maul the house.

Our stone house was not an ideal
place in such a time; but having no
fraid-hole, I was not sure I could
think of nothing—just
tensely stand and watch.

Merely, the blinding agony demon
bore down upon us. Sverring its
tail slowly, it seemed to go along
with ease, there and then it
dipped just right to catch the roof
of the barn, ground it to pieces, and
then swooped to maul the house.

Who would have thought of accus-
ing me of pessimism when I frantically
cried to my brother-in-law, "Heard as
I shouted 'Cyclone'!" No! Not
pessimism, but the screaming of a
fear.

Now apply this to our economic
plight. Now but the thoughtless
and blind of our time, that an
economic tempest is rising.

But why is this tempest reserved
for our day? Why did it not come
when our grandfathers were
parents? Hasn't this economic
evil been a plague for genera-
tions? Why is this the fate of our
day?

There has always been disparity
arising out of injustices, but the
conditions of our day are
constantly at work to unify things
in the conditions of our day, the
limits of the present and again,
why will they not now?

This is why. For the machine
handled by men with shovels; now
one man with levers does the work
of many scores of men. Profits
therefrom benefit the few.
The disparity between the rich and
poor, face privation and suffering.

Since the invention of the balloon
in 1782-1783 practically all inven-
tions have been made for the im-
provement as compared to the history
of man.

Blessings they are; but many of
them serve to fatten the purses of a
few, while bringing want to an host.
This is the machine age. Wealth
is not possible except it pre-
cludes or supersedes man-earning-
wealth. Equity is not possible
except where there is individual ac-
cumulation of machine-earning-
wealth, whereby man-earnings are
curtailed.

Let's put it bluntly and wake up
those who are asleep. Machine
earning-wealth is the preclusion of
man-earning-wealth are CRIMIN-
AL (unlawful) because they rob
others by forcefully taking from
them their man-made heritage—the
right of labor and its reward.

This robbery is not so far re-
mained in reality as it is in theory.
In one case a machine may
capture a pistol is used and you are
robbed of your life. In the other
a labor-saving machine is used and
you are relieved of your livelihood.
The difference is that in the first
case, the machine is used as a threat
of violence; and the other by
subtlety.

Is this the remedy?—discard
machinery? Not at all! If one is
at the point of a pistol, the
best thing to do is to fight back
and rob the robber.

There is the remedy. The only
thing to do is to return to the
community the machine-earning-
wealth whose share the machine
had robbed of jobs and their re-
wards.

"I invented the machine," and
I ought to the profits it makes,"
are good arguments. The rights to
the earnings of an invention or of a
patented machine cannot possibly
receive his share of production. Cer-
tainly to deprive him of his
robbery him.

And added to the ever-increasing
inventions which displace laboring-
men in growing numbers is the
acceleration of the rate of inven-
tion. A fearful state of affairs
reached, now that virtually half
of our lives go for interest. For every
dollar I pay in taxes to the support
another dollar I have approximately
another dollar taken from me by
the guise of taxes and paid to the
favored citizens who give me the
equivalent in service to their giving
me something for nothing as
well as in the form of a bribe.

Our forebears knew nothing of
machinery which makes rich the
few and poor the masses. They
knew nothing of the millions of in-
terests which have absorbed our
necks, losing to hundreds their
lives, and to thousands others, for
nothing, may have their lives
demanded without labor, without pro-
duct.

With these two monsters, among
others, to plague us, need anyone
be surprised that we are in the
onrushing tempest? Will the im-
posing human element in the
chaos of the world cling to the
pillars of their power, like
Pharaoh's hosts, perish together?

The chemical industry is practi-
cally a monopoly in the hands of
one chemist, because it is continually
pioneering into new industrial lines.

HUSBAND WANTS WIFE
TO BUY GOODS LOCALLY

Every wife knows that her
husband's view of home buy-
ing are simple, says the
Herald. That he favors
the local merchant, pro-
pensity to the far-away "Bargain"
dealer, she may attribute to the
well-known, masculine charac-
teristic which gave birth to the
word "manly." Perhaps he doesn't
say a great deal on the subject
of home buying in a casual way,
but there is reason for his
business—that of earning money
to keep the home, but he is
puzzled, nevertheless, when his
wife shares all her trade among
the local merchants.

And there is reason for his
feeling content when she does
so. He knows that when times
are hard, the local merchant
will be able to find it and re-
spond to his needs. He also knows that a tight
monetary situation in the com-
munity can be helped by
concentrated buying through
local channels, so that the
profit is saved for the com-
munity instead of some far
distant market. He knows that when the local
merchants are getting the maxi-
mum of trade from the district,
they, in turn, are spending
freely in the community, and
so raising the "tight money"
predicament. If you ask your
husband why he likes to trade
at the local store, he will tell
you that in doing so you are creat-
ing new community wealth.

Our stone house was not an ideal
place in such a time; but having no
fraid-hole, I was not sure I could
think of nothing—just
tensely stand and watch.

Merely, the blinding agony demon
bore down upon us. Sverring its
tail slowly, it seemed to go along
with ease, there and then it
dipped just right to catch the roof
of the barn, ground it to pieces, and
then swooped to maul the house.

The Quality Of Northern Wheat

(Radio Talk by W. D. Albright, Superintendent, Dominion Experimental Substation, Beaverlodge, Alberta, over CFOP, August 24, 1938.)

Fellow Wheat Growers of the North:

For three years past the Department of Field Crops of the University of Alberta has been collecting wheat samples for study from the various parts of the province. After being graded and analyzed for protein, the wheat samples are milled and baked in the laboratory to determine the learning for one thing, how northern wheat compares in value with wheat grown in the drier prairie areas and how the leading varieties compare with one another. It is particularly desired to know how wheats compare for blending purposes. The premium commanded by Canadian hard red spring wheat on world markets is based upon its suitability for milling with the soft, low-protein wheats of other countries to improve them for bread-making.

With the world-wide quest for self-sufficiency in food production, and with the progressive changes in baking practices that are taking place in most wheat importing countries, it has been found that wheat goes along with smaller and smaller proportions of Canadian hard red spring wheat in the millstream. It is the superior quality of our wheat that commands the premium in price which enables us to produce wheat commercially as far from the seaboard as we do. Unless that quality is maintained, we shall be largely forced out of the wheat export market.

Quality of wheat for bread-making purposes depends largely upon high protein content, say 12 per cent and upwards. Along with the percentage of protein the character of the protein is to be considered, and there are minor factors involved, but protein percentage is the best single measure of quality in our hard red spring wheat.

The three factors tending to produce high quality in western Canadian wheat are variety, soil and climate (or season).

Some varieties are better than others and certain ones that are satisfactory when grown under one set of conditions do not compare so favorably when produced elsewhere. For instance, on the lower plains Marquis and Hereward are best wheat, but when they are grown in the North they usually have the edge, possibly because earlier it generally matures under more favorable weather conditions.

Other things equal, the grey soils of the wooded belt produce poorer wheat than the black or brown soils, and, generally speaking, the cool, moist maturing season common in the North conduces to plant filling rather than to high protein percentage. Our wheat really ranks better from an exhibition standpoint than from a miller's point of view.

Much, however, depends upon season. In the dry summer of 1925 the Beaverlodge Substation grew

Marquis wheat on two soil types in a cooperative test for Prof. T. J. Harrison, then of the Manitoba Agricultural College. The sample grown on summerfallow black soil carried 42 per cent more protein than the sample grown on grey soil after sunflowers. The black soil sample made one of the best leaves of wheat of all the samples sent in to Prof. Harrison that year from all over the Prairie West.

Again last year, when Dr. A. G. McCalla of the University of Alberta was collecting samples for his winter study he took a bulk sample of Red wheat grown in a sweet clover rotation, test on a second-class wooded soil on the top of the ridge on the Substation farm. This wheat tested 15.8 per cent protein and made an excellent loaf of bread. On the other hand I have seen Gary wheat grown on grey soils in a wet season that tested as low as 8 per cent protein and made bread unfit for use. It would degrade almost any millstream to which it was added and a cargo of it would do great harm to the reputation of Canadian wheat.

It would appear possible, in some seasons at least, to grow high-class export wheat in the North if we will use the best varieties available under the best cropping methods. Sweet clover may help a little. It is important to learn how to grow good wheat, for in the long run the price that any region receives will depend upon the quality of the wheat it markets. We can't fool the trade.

Dr. K. W. Neatby, Professor of Field Crops at the University, and Dr. A. G. McCalla, his assistant, have summarized three years' investigations in an excellent bulletin entitled "The Production and Quality of Cereal Crops in the Park and Wooded Areas of Alberta." The two first years' investigations were none too favorable to the North, but the season of 1937 improved the case. It is desired to carry the investigation on at least two years longer. Possibly the present dry season will still further improve the showing for northern wheats unless hard frosts occur before cutting is completed.

More samples are required for the study. In the front of the bulletin is a blank form to be filled out and sent in by any northern farmer willing to contribute a one-pound sample of his 1938 wheat crop. It is important that the samples used be widely representative hence from many offerings a judicious selection will be taken for milling.

Though I am not authorized to say so, I feel quite sure that Dr. Neatby and Dr. McCalla would appreciate the offer of samples from the British Columbia portion of the Peace. In conclusion, friends, I urge you to write at once offering a one-pound sample of your wheat. If you have the bulletin at hand use the form it contains. If not, write for the bulletin and in doing so offer the wheat. Address: Department of Field Crops, University of Alberta.

In the introduction and on behalf of the University, I thank you.

The SNAPSHOT GUILD

CAMERAS BY LAKE OR OCEAN

YOUR RECIPE FOR

Happiness

TAKE two crisp, toasted Shredded Wheat... smother with several spoonfuls of luscious, juicy, sliced, ripe peaches... pour thick, fresh cream, or milk over in generous measure... sweeten to taste. An enticing, delicious, nutritious meal!

THE CANADIAN SHREDED WHEAT COMPANY, LTD.

Niagara Falls - Canada

EAT 12 big biscuits in every box

SHREDED WHEAT
MADE IN CANADA - OF CANADIAN WHEAT

Enlarged from portion of negative taken with a folding camera giving past-cast size pictures. Exposure 1/100 second at f.11 on super sensitive film.

COMES the time every year when many of us make for the lake or seashore for cool breezes, swimming, sailing, motorboating, fishing, and the many other pleasures that go with a sojourn by the water.

Any one can enjoy this fun without a camera, but verily to go and return without having made a picture-story of your visit seems as useless as trying to write a book about it with water for ink. When you have finished, your memory may retain some of it for a time, but eventually you remember little else than the fact that you went there. Years later you will say, "Yes, I had a good time that summer," but what did you see? What were you with? What did you do? Set a million that with nothing in your snapshot album to show for it, you will remember scarcely anything of the details of that good time, and regretfully wish you had.

Another reason for taking your camera to the lake or seashore is

that where water is, with its bright reflections, you have exceptional chances for making fine pictures. Usually by the lake or seashore, even on cloudy days you have more light to work with than inland. The extra light gives you opportunity to "stop down" (use a smaller lens opening) and thereby obtain sharp, clear-cut details.

Also there is no better place for interesting action pictures than a summer resort. Except for the beach itself and the hotels, cottages and wharves, everything seems to be in motion. Of course, if you want close-ups of fast action you should be equipped with a fast camera, but don't forget that splendid work with many water scenes is done with an inexpensive fixed focus camera. If it is rapid motion such as an approaching motorboat, setting that at a distance of 75 to 100 feet and usually you get it without blur. Then have an enlargement made when you get home.

John van Guilder.

Saskatoon Island And Saskatoon Mt. Parks

(Radio talk by W. D. Albright, Chairman of Local Advisory Committee, over CFOP, August 24, 1938.)

Through the courtesy of CFOP, which has placed its services at my disposal for a little while, I would like to say a few words on another subject? On behalf of the Local Advisory Committee having to do with Saskatoon Island and Saskatoon Mountain parks I wish to express our appreciation of the extent to which the Island has been used this summer.

Since the present to the Island is beginning to lay waste to it that it has been made more regularly accessible from the southwest.

The history of these two public park areas may be told at another time. Suffice for the present to say that in 1935 Hon. H. W. Allen, then provincial Minister of Lands and Mines, asked me to act as chairman of a local advisory committee to be consulted from time to time by the provincial Parks Board regarding Saskatoon and the then proposed Saskatoon Mountain parks. Appointed with me were two other members—Mr. J. Archer of Wembley, who had been a member in having Saskatoon Island reserved and who had also seconded the motion for its reservation, and I was to have the Mountain reserved for park purposes, and Mr. S. B. Allison, who lives near the Island and has since taken a great personal interest in its development. It may be in order to mention that the members of the committee serve for honor and pay their own travelling expenses.

Facilities on the Island Appropriations of public money for development have been necessarily scant during these hard times, but two caretakers have been employed at a merely nominal remuneration, Mr. Justyn Rigby, for the Island, and Mr. Walter Bowen, for the Mountain. Their major duties are to watch for fires and to guard against depredations. Both have been attentive and Mr. Rigby has done a great deal in other ways, assure by local residents, among whom the annually appointed picnic committee of the order of the Island has been given special mention. Through such cooperative effort the parking spaces and ball grounds on the Island have from time to time been cleared and widened, while the limited appropriation available has been used to install a sheltered camp stove, dressing room for bathers, toilets, benches, camp tables and signs and finally a cabin for rent to holiday-makers.

By special arrangement the Parks Board has been granted the privilege of erecting a pavilion for boys' and girls' camp work, and to this was added this year cabins for the use of your Youth camps. The pavilion has been taxed to capacity and the Lutheran League has applied for like privileges. Such privileges are granted only at such time as the Parks Board may be able to find time to be by volunteer labor. In 1937 a very nice bit of volunteer work was done in helping to clear and grub a boggy stretch on the highway approaching the hill from the Bertram corner after which Guy Gault, for the provincial Department of Public Works, did an excellent job of grading this way.

Nearly and friendly in the ambient haze Bold Saskatoon uprears his beeting brow— The feature of the landscape from whose prow A million-acre farm rolls at one's feet While twenty lakes lie glistening in a mass Of billowy landscape, Vales and and valleys meet.

A panoramic spread of park and plain Breath-catching in its sweep. We have long-range pans for Saskatoon Mountain and posterity will thank us for our foresight. The immediate objective, however, is an easy trail up from the southeast, skirting the southern brow of the hill, and connecting with the rather steep crooked track which descends to the westward slope. Part of the proposed trail was surveyed and brushed out years ago as a relief to the hazy booby trail which was and needs further attention. Part of it is to be cut out of virgin bush, and the rest is to be made by clearing.

This year's appropriation for the Mountain has been largely used in providing an 18 by 30 pavilion in the form of an open-front shelter for picnicers who may be caught by rain when on the hill, as a crowd was last summer when it was there. So, if the southeast access trail is not yet finished, it will have to be by volunteer labor. In 1937 a very nice bit of volunteer work was done in helping to clear and grub a boggy stretch on the highway approaching the hill from the Bertram corner after which Guy Gault, for the provincial Department of Public Works, did an excellent job of grading this way.

Even that magnificent enterprise known as the Monkman Pass Highway Association affords no finer example of cooperative spirit than the way in which the whole countryside has united to develop and use Saskatoon Island. Hundreds of people a day have visited it this summer and the Parks Board is the playground of the Grande Prairie district.

way Association affords no finer example of cooperative spirit than the way in which the whole countryside has united to develop and use Saskatoon Island. Hundreds of people a day have visited it this summer and the Parks Board is the playground of the Grande Prairie district.

Picnicers' Pavilion on the

Saskatoon Mountain

Lacking open water, it may never be to the same extent as the Island a local playground, but as an appeal to tourists and as an inspiring spot to visit it stands in a class by itself. It affords the nearest thing to an aeroplane view that I have ever seen from the ground. Prof. Charles Colby of the University of Chicago, who brought an advanced geography class to the Peace in 1929, pronounced the view from that hilltop the finest combination of rural landscape and mountain setting that he had ever seen. More good land can be seen from that hilltop than from any other point in the Peace.

I used to think when near-by the Peace from Saskatoon Mountain that it was probably exaggerated. I found it far better than I had expected. It is a wonderful thrill of exaltation. I even described it one time in verse, under the title, "A February Morning in Grande Prairie." The verse about the Mountain runs this way:

Facility and friendly in the ambient haze Bold Saskatoon uprears his beeting brow— The feature of the landscape from whose prow A million-acre farm rolls at one's feet While twenty lakes lie glistening in a mass Of billowy landscape, Vales and and valleys meet.

A panoramic spread of park and plain Breath-catching in its sweep. We have long-range pans for Saskatoon Mountain and posterity will thank us for our foresight. The immediate objective, however, is an easy trail up from the southeast, skirting the southern brow of the hill, and connecting with the rather steep crooked track which descends to the westward slope. Part of the proposed trail was surveyed and brushed out years ago as a relief to the hazy booby trail which was and needs further attention. Part of it is to be cut out of virgin bush, and the rest is to be made by clearing.

This year's appropriation for the Mountain has been largely used in providing an 18 by 30 pavilion in the form of an open-front shelter for picnicers who may be caught by rain when on the hill, as a crowd was last summer when it was there. So, if the southeast access trail is not yet finished, it will have to be by volunteer labor. little later on this season we could organize a bee to do some trail cutting on the southeast approach? Peace River residents have made a name for themselves as trail-cutters. Shall we not keep up the good work?

A number of cars on Sunday now ascend the southwest slope, but care is needed on the sharp curves and steep pitches. I am told that at least one accident was narrowly averted this summer. When the southeast trail is completed it may become feasible to establish one-way traffic. Meantime there are two approaches from the highway. The better one runs north two miles along the east side of the Experimental Station. The road two miles east at the Halliday corner is rougher and not always passable for cars. Both connect with the highway that runs east and connects with the angling trail leading up the slope. Signs indicate the way and it is easy to follow, when it is not too muddy.

May I conclude by expressing the pleasure of the committee at the active support of Mr. W. Sharpe, M.L.A.; Mr. J. A. Aiken, secretary, Provincial Parks Board; Mr. A. H. McQuarrie, and many others.

The parks are ours to enjoy. Leisure spent enjoying nature is well employed. Cooperation works wonders. Thank you and good night.

Precipitation may have lowered grades. The pasture and feed situation is very satisfactory. There has been no damage from frost.

Saskatchewan While harvesting has been retarded by cool, wet weather, wheat cutting is now nearing completion in all but the central and west-central districts. Grasshoppers are still active and in the areas affected coarse grains are being cut for feed to prevent further damage. Pastures are good.

Manitoba Threshing is well under way in most districts, although operations have been delayed by scattered showers. Rust has reduced yields and grasses are progressing satisfactorily. Resistant varieties of wheat, and owing to the high percentage of rust-resistant wheat some of the year's output on the whole will be fairly satisfactory. Pastures are in good condition.

Province of Quebec Eastern Townships and Ottawa Valley—Harvesting of grains is well advanced, with better than average yields of barley and oats indicated in most districts. A heavy crop of fodder and sweet corn appears assured. Picking of later varieties of canning peas is now completed, with the yield above average. Small fruits are plentiful but apples will be a light crop. Potatoes and other root crops are progressing satisfactorily, with good yields indicated generally. Pastures continue in excellent condition. Cutting of a good average crop of tobacco has commenced.

Lower St. Lawrence and Lake St. John District—Frequent rains have caused some damage and delayed the cutting of grains, but crops are mostly in good condition and satisfactory yields are anticipated. Potatoes, turnips and other roots are doing well. Small fruits are plentiful. Pastures are in good condition.

Ontario Threshing of above-average yields of fall wheat of good quality nears completion and harvesting of satisfactory crops of spring grains is well advanced. The land is in good condition and plowing is general. Corn is making excellent progress and a heavy yield of fodder is assured. Root crops are in satisfactory condition. Heavy yields of tomatoes are in prospect. Pasture remains good. Apples are sizing well, but the yield is expected to be slightly below average, while a good yield of peaches is forecast. Pruning of a

heavy crop of blue-cured tobacco is well advanced and harvesting of barley and black varieties has commenced.

Weather conditions in Prince Edward Island during the past week continued favorable and crops are maturing rapidly. Harvesting of grains has commenced. Root crops and small fruits promise well. In Nova Scotia and New Brunswick variable weather has prevailed, with heavy precipitation in many districts, and further deterioration of potato crops through excessive moisture is reported. While some damage to grains from rust and lodging is indicated, the outlook generally is for a good yield. Apple orchards continue to make favorable progress and a good average crop is anticipated. Picking of the early varieties of fruit has commenced. Pastures are in excellent condition.

British Columbia Threshing of grain has commenced on the lower mainland and Vancouver Island and yields will be below average. It is anticipated that the potato crop will be 80 per cent of average. The tomato crop is now being picked, is a good average, but there has been some damage by rain. Peaches, plums and apricots are now moving to market in volume and in good condition. Apples are sizing and coloring well. The following tree fruit yields are now indicated: Prunes and plums, 90 per cent of average, peaches 80 per cent, apples 80 per cent, peaches 80 per cent. Codling moth is very active and continued spraying has been necessary. Pastures are in poor condition. Irrigation water in low in some districts, but recent rains have kept the situation from becoming serious.

ADVERTISING WILL KEEP BUSINESS ON THE MOVE Advertising is a mighty force to which we become exposed the moment our father puts our birth notice in the newspapers. Harold M. Gailley, vice-president, Silverwood's Toronto Dairy Co., Toronto, told members of the Rotary Club at a recent noon-hour meeting. The average accountant may say it is a questionable expense since you cannot always trace results, and the experienced manager may say it is an absolute necessity, added Mr. Gailley, but still what you will, advertising keeps your stock in trade from having holidays; it brushes away cobwebs and stuns slanders; it quickens the knowledges of autopsies and lets in the sunlight.

Threshing of above-average yields of fall wheat of good quality nears completion and harvesting of satisfactory crops of spring grains is well advanced. The land is in good condition and plowing is general. Corn is making excellent progress and a heavy yield of fodder is assured. Root crops are in satisfactory condition. Heavy yields of tomatoes are in prospect. Pasture remains good. Apples are sizing well, but the yield is expected to be slightly below average, while a good yield of peaches is forecast. Pruning of a

In Ontario there are heavy crops of the main staples and good progress is being made in harvesting. In the Maritime Provinces the crop of spring grains is well advanced, but in some districts excessive moisture has damaged potatoes and grain.

In British Columbia occasional showers at the coast and heavy rains in the interior have caused some delay in grain and hay, and yields of these will be below average, but roots generally and tree fruits are doing well.

Alberta Intermittent rains and lower temperatures during the past week have generally delayed harvesting and retarded ripening of late grains. Slight rust damage is reported in the northeast and east-central areas.

The Importance of Price

To the wheat producer the price of his product is a matter of first importance. That is why the Alberta Wheat Pool fights so strenuously for price protection. Single-handed amidst the trade, it has striven to place the wheat price question in its proper light before all Canada.

In such a campaign it needs support and encouragement from the farm population.

This can best be done by delivering grain to Alberta Pool Elevators

ANNOUNCING

the opening of a Kindergarten Class In Pianoforte Playing

especially adapted for children aged 5 and 6 years

The material to be used in this class is of an entirely new type, and is sure to appeal to children too young to read well, and at the same time furnish them with a good grounding in the principles of piano technique, musical notation and rhythm, as well as general musical appreciation and singing. Further information will be gladly supplied to those interested.

Regular classes in PIANO, VOICE and THEORETICAL SUBJECTS will be resumed on September 3rd

Interesting News From Sexsmith

Vol. VII, No. 11 By R. A. MACLEOD August 30, 1938

NEW ARRIVALS IN THE DISTRICT

At the Sexsmith Maternity Hospital: Born to Mr. and Mrs. Andrew Rodin, La. Glace, August 12, a girl, to Mr. and Mrs. Eric Krantz, Hythe, a boy.

At Grande Prairie Municipal Hospital: Born to Mr. and Mrs. Ernest Kirslein, Sexsmith, on August 24, a girl.

At the home of Mr. and Mrs. G. R. Sharp, Sexsmith, on August 28, twin girls, Carol N. and Janet K. (adopted).

FIRST LOAD OF WHEAT DELIVERED AT SEXSMITH

We understand that the first load of 1938 wheat to be delivered in Sexsmith was at the Alberta Pacific Elevator. This was on August 24, from the farm of Mr. Richie Griffith. It graded No. 2 Garnet.

SEXSMITH BOYS SEE THE WONDERFUL KINUSO FALLS

Fred McNaughton took a number of boys out to view the Monksman Highway last Wednesday. They took their blankets and grub box along with them and stayed until Sunday. Saw Kinuso Falls, Green Lake (in which a moose was bathed), and grabbed a few trout for breakfast one morning.

Fred's crew was made up of Jack Bohr, Frank Hild, Allan Redwood, Gordon McNaughton, and Freddie McNaughton. Needless to say the boys had a wonderful time.

George Gouchie, Marion Gouchie and Muriel Weicker were also visitors to the highway last week.

DOGS WITHOUT LICENSES WILL BE DESTROYED

Some of the dog residents of the town are still without their 1938 licenses, and owners are asked to remedy this at once, as those without the proper tag will be destroyed. Some of these dogs have been making life miserable for the residents at night with their howling, and although a dog with a tag is just as liable to bark particular hounds at night as the dog without the proper credentials, he is a much better insurance risk.

SPEED LIMIT 15 MILES MOTORISTS ARE WARNED

School will open in Sexsmith on Thursday, September 1, and attention is hereby drawn to the speed limit of 15 miles an hour, placed at all approaches to the school. There have been a number of drivers who have been exceeding this speed limit, and we would suggest that those who are within the village limits that they keep their feet off the gas. These kiddies have been running.

PIPESTONE CREEK

BIG HUNTING PARTY LEAVING
PIPESTONE CREEK, Aug. 30.—Bert Osborne, the well-known guide, is leaving here for the mountains to hunt sheep. He is taking a party of four from Galveston, Texas. Two members of the party are being as far as Edmonton in their private plane. The party will hunt sheep, goats and deer. (Whoever who has a special license. Accompanying the party will be Adam Kenny as chief of the party. (Whoever who has a special license. Accompanying the party will be Shuttler and Dan St. Arnault, with Lawrence Osborne as horse wrangler and experienced hunter.)

FARMING OPERATIONS MIXED

Haymaking, harvesting and thrashing are all mixed up this year and have occasioned a very busy spell locally. Hooker's Limited thrashing today. Finlay Watson and Don Noyes started yesterday. There is still considerable cutting to do and the crops are taking much more time than at first anticipated.

DISTRICT BUSY ON SUNDAY

Sunday saw many bathing in the Wapiti and many more on the road including several threshers men gathering up crews. Some excitement was caused by a car accident on the road. Carl Brookes will guide this party into the Rockies and Len Jensen will also accompany the party, who are leaving here early this morning.

HYTHE NEWS

HYTHE, Aug. 30.—On Thursday evening last a farewell in the form of a surprise party was given in honor of Mrs. and Mrs. Van Volkingburgh of Hythe, who are leaving to make their home in Edmonton, where they have been for some time.

After all joining in some jolly games, Mrs. Van Volkingburgh was called to the front, where the president of the women's association, Mrs. J. B. Macleod, presented her with a beautiful bouquet of flowers.

On the occasion of your departure from Hythe, we, as representatives of the many friends who have made here during the past eight years, wish you to know that your presence in this community has been highly valued. Immediately upon your arrival here, you identified yourself with the church, consistently, efficiently and cheerfully.

The new church cannot expect you to remain with you, but we are glad to have you and your family here, having said feelings, for we know you are going to miss us greatly. However, we trust you are not losing your friendship. We venture to hope that sometimes you will think of us.

To the new church, we are also to help us express our appreciation of you and our best wishes for the future. May God bless you and continue to use you in his service.

A beautiful silver tray, a picture, and an electric iron were presented to Mrs. Van Volkingburgh by the women's association.

Mrs. Van Volkingburgh said it was with a feeling of deep regret she was leaving Hythe, but she was thankful that they for their lovely and useful gifts.

A delightful lunch was served.

DEBOLT ITEMS

COMMUNION AND BAPTISM AT CHURCH

DEBOLT, Aug. 29.—Rev. A. Willis Camp, minister of the United Church, held a communion service at the church on Sunday afternoon. He was accompanied by his wife and two sons. Twenty-one people were received into the membership of the church.

Little Lorne McArthur and Richard McFalls were christened. After the service, the Ladies Aid served tea at the Manse.

Mrs. Norman Leslie and daughter and Mrs. Holland of Dimsdale were visiting in Debolt for a few days last week.

Mrs. Leslie was in the home of her mother, Mrs. Turner, and Mrs. Holland at the home of her brother, Mr. J. B. Macleod.

Miss Bessie Woods of Calgary will arrive in Debolt on Friday, having been in Portland, Oregon, since last week. She was receiving medical treatment.

The fire crew from north of Sturgeon Lake came home on Saturday. Two men were left there to patrol the fire.

Thrashing machines in this district are starting the first of this week.

Mrs. Dodd and daughter, Grace, are going out on Tuesday's train for a few months' stay in Edmonton.

EDSON TRAIL SCHOOL

NEW TEACHER ARRIVES

DEBOLT, Aug. 30.—Today Wm. Geo. Tilley and W. G. Given and son Ben were on hand at the Grande Prairie station to meet Miss Bessie M. Woods from Calgary, who has been applied for the Edson Trail school.

The new teacher is highly recommended and as attended the Old Agricultural College and also taught in College of Education. She has a keen interest in all young people's work.

Miss Woods is Miss Wood's daughter and she is delighted with the opportunity of having this privilege to teach.

The school board extends to Miss Woods a cordial welcome and pledge themselves to give her every assistance in their power. In turn, the school board asks the parents to cooperate with the teacher and the board in all matters pertaining to the welfare of the school.

The trustees meet the first Monday evening in each month, at the school, and their meetings are open for any ratepayer.

The grave of Publius Nonius Zethus, ancient Roman baker, had a basket of flour and a loaf of bread on his tomb.

TRIBUNE CLIPPING ADS. BRING RESULTS

GOODWIN

GOODWIN, Aug. 28.—Mr. Munroe and son, Tommy, left for outside points last week, where they expect to be gone for a couple of months.

Mr. Moody of Sexsmith was in the district on Tuesday, buying cattle.

Alec Goodland has cut E. Davies' and Campbell's crops this year.

Mr. Willie Munroe spent Monday evening with B. Lene.

Mr. and Mrs. Goodwin were Sunday guests of H. Henry's.

Rev. Mr. Thorpe, who has spent the summer in and around Goodwin, left on Tuesday.

Mr. Moody and A. Lind made a trip up to McCann's lease on Tuesday.

The H. Blow family, who have spent the past couple of weeks at the Davies home, left for their home in Calgary on Wednesday.

R. Crowe and Mr. and Mrs. J. Lene visited in Debolt on Tuesday evening, bringing back Arlene with them, who has spent her vacation there.

All the kiddies are getting their school shoes ready for another term of school.

Miss Margaret Davies has also left for outside points.

Mrs. White was a visitor at Mrs. Lind's on Sunday.

Big Smoky Doings

MOODY'S CROSSING, Aug. 29.—The Smoky Mountains have been the guests of Mr. and Mrs. Eric Moody, who have been in the district for some time.

On Wednesday, Miss Margaret Davies returned with them for a visit with friends and relatives in Calgary.

Mr. and Mrs. Ron Moody and son and Mr. and Mrs. Moody returned to Edmonton on Thursday and returned Sunday. Mrs. Bob Moody and children and Miss Anne Alloway, who have been visiting the Wm. Moody's for the last month or more, returned to their home in St. Paul.

On Thursday the McNeill Transfer van came in for the furniture of Mr. and Mrs. Black to move it to Edmonton.

Mr. and Mrs. Hall and sons of the district returned from Edmonton on Thursday.

On Friday Mr. D. Taylor, representing Johnson's Floor Wax, returned via the Sturgeon Lake cut-off to Calgary.

Mr. Beestelone of Grande Prairie drove out to Hield and son's place, Prairie to visit friends Friday afternoon.

The National Fruit truck made a trip to Valleyview on Saturday.

Mr. and Mrs. Sumner of Sexsmith and Miss Margaret Campbell of the district returned to Sexsmith on Sunday. Miss Campbell called in at the Ferry Inn to say "hello" to her mother, Mrs. Ross, and the meeting with each other for about fourteen years.

Quite a number of people back and forth over the ferry on Sunday and Monday. The minister and his wife were also on the ferry.

We often hear the wild geese south these days. Surely they aren't going south so soon.

East of the Smoky

SPECIAL SERVICE HELD AT CHURCH

DEBOLT, Aug. 30.—The United Church in Debolt had a full day of service on Sunday. The minister, Mr. DeBolt, R. A. Steed, B.A., had planned for a very special service to be held on Sunday. This was one time the weather man was in our favor, and his Reverence, accompanied by his wife and two sons, had a pleasant trip to Debolt.

Mr. DeBolt had felt the need of forming a congregation in connection with the church. He had been anxious to have this done before leaving the field.

The church at Debolt was a good one. The service was conducted by Mr. Cann, assisted by the local minister. They were scheduled to hold service at Goodwin at 8 o'clock.

In another four weeks Mr. Steed will be leaving for his home in Toronto, and this makes us think of winter approaching.

The church at Debolt is in good shape financially. Last year it was wiped off and more seating was added. This was a great help to the friends in the locality. The field is expected to raise the necessary expenses, and it is hoped the people will take a part in this matter.

It is a matter of great regret that an all-year minister could not be maintained, as much time is lost while the church is waiting for its successor comes again.

COLLECTORS INTERESTED IN STAMPS FROM AN UNDERGROUND POST OFFICE

Philatelists in all parts of the world are taking a sudden interest in the "underground post office" stamps. The demand for philatelists is for envelopes and other mail items bearing the postmark of the underground Coover Pedy postoffice.

McLENNAN NEWS

Curling Club Will Enter Winter Season In Sound Position

McLENNAN, Aug. 29.—A meeting of the McLeNNan Curling Club was held on Monday evening at the Curling Club, blockman for the Cocksfoot Plow Company in the Peace River. I joined them in the afternoon and were off in a V-8 bound for our journey in the first lap of our journey.

We reached the ferry in good time and were soon across the Smoky and pushing our way along on an excellent highway.

A short stop was made at Sturgeon Lake, where we called to see Mr. and Mrs. Tom Kerr. They were both enjoying very good health. Unfortunately, Mr. Kerr is gradually losing his eyesight. At this point we had the car checked over by L. A. Suck. Here we met Mayor Tooley, who had for passengers Frank Spicer, Father Redmond, and J. B. Macleod. The Mayor's car had a blow-out and of course it had to be fixed. Later they proceeded to the Capital City.

At the Lake we learned that the summer resort proved quite popular. The club has balanced its budget for the season.

TENNIS CLUB FLOURISHING
The McLeNNan Tennis Club is flourishing with 80 members. All the indebtedness on the old courts has been paid and a substantial payment has been made on the purchase of two added lots.

The courts are now used and provision made for a fourth. The club has balanced its budget for the season.

TALKIES PROVE POPULAR
The talkies have been a great success here. The houses each week, people coming from a great distance to attend the movies. The talkies have been a great success here. The houses each week, people coming from a great distance to attend the movies.

ELKS WILL SOON OPEN HALL
The Elks will hold their next meeting on Monday evening, September 12. It is hoped to pay off the balance owing on the hall by the end of the year.

TAKES REDUCED 3/4 MILLS
The tax on the houses has been reduced to 3/4 mill. The houses have been in the town's position since the lots in the south section of the town have been sold. The new section has resulted in reducing the tax to 3/4 mill.

BUILDINGS IMPROVED
On the whole, the town has been considerable improvement in many buildings. The R.C.M.P. barracks have been improved. The houses have been improved. The houses have been improved.

PERSONAL ITEMS
Most everyone is back from their holidays and the town is beginning to pep up.

Joe Faudes and Alfred Rump left on a holiday trip to Hudson Bay on Tuesday. They will, if time permits, take a run out to the coast.

Joe Faudes, locomotive foreman, is making preparations to move to Edmonton.

LAKE SASKATOON

LAKE SASKATOON, Aug. 30.—Messrs. Olaf and Irvine Grimsrud have been in the district for some time. They will remain for the harvest months. They are staying with an uncle there.

Mrs. Aldridge and daughters of Edmonton have been spending their month's holiday in the Lake Saskatchewan district, visiting at the Ferguson home.

We were sorry to hear that Mrs. G. F. Duncan had received news of her father's death. It seems he had been in ill health ever since an accident he was in. We express our deepest sympathy, on behalf of the district, to Mrs. Duncan and family.

Miss Joan Frewer returned home on Friday night after spending an enjoyable fortnight in Edmonton and vicinity.

Mr. Albert Smith has taken a few days' holiday trip up the Monksman River.

Miss Christina Monksman, who has recently returned from Saskatoon after occupying the position as cook for the boys, is now spending a few days' holiday in the district.

Bob Boyd of Capital Creek has been staying with his relatives here.

BIG CROWD AT HALL DANCE
A large crowd attended the dance held in the Memorial Hall on Friday and everyone reports a good time. The dancing was in the evening and the morning.

The dancing at the Lake dances will soon regain their old popularity as they did when the hall was on the old townsite. Everyone recalls Bert Funnell's popular dance programs at that time.

Miss Pat Frewer and Miss Audrey Cuthbertson will be resuming their studies at Grande Prairie High School this week. Marjorie Sebastian will be going to Hythe.

Mr. Jack and Howard Minchin will be taking over their duties as teachers for the Lake school when the term starts September 1.

Thrashing is well under way in most parts of the district. Weather conditions up to the present time have been very favorable.

LAST WEEK'S LAKE SASKATOON NEWS

LAKE SASKATOON, Aug. 29.—We were pleased to hear that Mrs. Hugh Smith has returned to her home after undergoing an operation for a hernia. The operation was successful. We sincerely wish her a speedy convalescence.

Miss Alice Sutherland has been spending part of her vacation at Vancouver, B.C. She is now on a visiting friends and relations there. After her return she will be resuming her duties at Bay Tree school.

Mr. and Mrs. E. G. Cuthbertson have been entertaining guests at their home recently, namely, Norman and Gladys Cuthbertson, and Mr. and Mrs. Margaret Clark and Allan Macleod. The guests were very much enjoyed and demonstrated that this country is especially attractive to the growing of this type of flower.

The federal Liberal convention is being held at McLeNNan, B.C. The latter part of September and in this most important railway center of the province. The Liberal party is now in the process of selecting a candidate for the coming election. Stated in another way, the Liberal party is now in the process of selecting a candidate for the coming election. Stated in another way, the Liberal party is now in the process of selecting a candidate for the coming election.

A local man's name was mentioned

Around the Loop

By J. B. Yule

As the possible Liberal candidate.

We Rush On
On Sunday forenoon the car was headed for the town of Peace River. We were on our way to meet a mile of wild ducks were swimming rather lazily not far from shore. "There's the life," observed Tom, who further remarked, "Those birds are not worrying about crops, the price of grain or what party is going to be elected at the next election. What a life!"

We stopped at Donnelly for a short time. The people were coming out of the Catholic Church. This gave us an opportunity to meet many who have cast their lot with the district and are doing their bit in the development of the country.

The farm owned and operated by Leonard Poquette, situated a mile east of Donnelly, with its fine well-painted buildings is one of the finest in the whole Peace River country. The wheat crop was estimated somewhere between 12 and 15 bushels.

It was noted that many in the Donnelly area are growing sweet clover, of which we saw some excellent stands.

Peace River and Grimsheaw
From McLeNNan we travelled along a gravel highway to Peace River, where we were greeted by some of Clark's old friends. It's a wonderful thing to travel with a man who knows practically everyone in the country. It makes travel a real pleasure. Dinner at "Bill's," and we were soon across the bridge and on to Grimsheaw, where we stopped for the better part of an hour. In the area we had opportunity to see the devastation of the hail storm when some 40 quarters of crop were given into the ground. As one man put it, the major portion of wheat shipped from this point would come from the Battle River country, which Grimsheaw is the shipping point. The wheat was delivered at Grimsheaw Thursday, August 25. The wheat in the district mentioned, were told, was spotty and would fetch a low price, about 40 and 40 bushels to the acre.

The Grimsheaw Curling Ring, which was started last year, has been completed and painted, the finishing touches being put on by the grain buyers. The ring is a fine one, with a cement basement, has a large waiting room, and is one of the finest in the Peace River country. It has a membership of 50, including the ladies.

Fairview
How these modern cars can eat up miles! In comparatively short time we were at Fairview, where we were met by the first of the new cars which was nearing completion. The hospital is built on the highest point of the land, and the entrance is at about the same level as the top of the grain elevators.

We were fortunate to meet Tom Watt of Beaver Lodge, who had the contract. He explained that the hos-

pital has a full basement and in the two other floors there is provision for 23 beds and will cost in the neighborhood of \$22,000.

Mr. Watt further informed us that the hospital, which is the only one of its kind in the hills, where the land and the land around it permits of perfect disposal. Water is piped from a well 1.5 miles away.

A wide road leads up to the building, which gives a stranger the impression that it is the entrance to a park. On a favorable night the lights of Spirit River can be plainly seen. The building is a credit to the country.

On to the River
Reluctantly we left this smart, clean-looking town for home. When we reached the river the shadows of evening were beginning to fall. The ferry was reaching the other shore, so this gave us ample time to contemplate the delightful and peaceful scene.

The river was very low. The ferryman, Dave Smith, who hails from the Land of the Heather, informed us that the big stream is the lowest it has been for years at this time of the year. He further stated that the traffic at this point was lower than it was last year, when traffic had reached a very low point.

As we ascended the hill on this side of the river we noticed that a large flock of sheep were turning in for the night on a spot skirting the water.

Once upon the long drag, the V-8 continued to perform excellently and we were soon in the hills, where we saw one lone rabbit, the first of its kind in the hills for many months.

At last the light of Grande Prairie appeared in view and we were soon home. We were travelling over three hundred miles.

To Mr. Clark, who made the trip possible and provided an invaluable company, I say "THANKS" in capital letters.

EDMONTON

The Valley Of The Snow-Capped Hills

By W. C. Pratt

On Sunday morning, August 14, long before the churches had commenced their religious devotions, a party of Grande Prairie business men, comprising Hector Morrison, Norman Swallow, Alex. Dalgleish, Jas. Bowen and W. C. Pratt, pointed two cars westward, with their objective "The Monksman Pass Highway." Purchasing fishing licenses at J. Barrett's store at Rio Grande, for which Joe had to be rescued out of a comfortable bed, the trip began.

So much has been written about the Monksman Pass Highway that the party were prepared for anything. Several times the cars were halted while the party unloosed their view of the scenery. There is one thing about

"HONEYMOON BRIDGE" OVER KINUSEO (CONTRARY) RIVER

the trip, the farther you go the more beautiful and spectacular the scenery. Sunday night the party camped at the Contrary River beyond Stony Lake. There is an ideal camping grounds there, with but a few fish, as the river this time of year is shallow at this point. The bridge across the stream is known as "Honey Moon Bridge." Billy Salmon after supper lingered for considerable time on this bridge and next morning insisted on Alex. Dalgleish taking his picture while he leaned against the bridge. The party arrived at the end of the trail about noon, which is about five miles on this side of the Murray River. A sign stated "This way to Kinuso Falls. Approximately 4 Miles." "Tarzan Boulevard." Packs were so arranged and supplies set out for a day at the Falls.

As Hector Morrison swung into the lead I gazed at him in wonderment and thought of what a wonderful lead horse he would have made. It is my opinion that if Tarzan had ever seen this trail to the Falls that is called after him he would have backed away from it, and many times during the endurance test the party sat down to take short rest and wonder how those Grande Prairie ladies ever made the grade. Grande Prairie certainly has some very sturdy women. When you arrive at the Falls it is almost straight up and down to the bottom. Here Norman Swallow arrived at the bottom with a tear in his pants and was accused of doing the bottom act. Alex. Dalgleish did a lot of trapeze balancing but never lost his Chevrolet smile. Geo. Pratt acted as "man about

camp." Jim Bowen, W. C. Pratt and Billy Salmon were responsible for the inner man and this was once that so many cooks did not spoil the broth, for all arrived home in fine fettle.

The fishing in these parts is fair. Two points that were not visited, Monksman Lake and the Murray River above the Falls, are, I believe, the cream of the fishing grounds. It might be here said that the fish in this district do not like hardware. At the Contrary River when the Spirit River delegation was there a fish pulled Jimmie Dodge of the Dodge Hardware into the river, and lo! and behold! the same fate awaited Jack Thomson of the Thomson Hardware. Jack was perched on top of a log, quietly fishing and politically day-dreaming, when all of a sudden

there was a tug and a pull and our brave Jack landed in the river, lock, stock and barrel. After fishing him out, he was heard muttering to himself, "Dodge wanted me." Let this be a warning to all hardware men that visit Contrary River.

Whatever you hear about the scenery of the Monksman Pass, believe it, for there is none better in any part of Canada. The road is rough, naturally, also a few stumps to catch the bottom of your car if not careful. One should take a car with lots of clearance, and even at that nine-tenths of the way calls for low and intermediate gear.

River is about two-thirds the size of the Smoky and the Falls is 210 feet high. It reminds one of the American Niagara Falls, but is much higher, as the Niagara Falls is only 167 feet high.

The Monksman Pass Committee deserves a mighty lot of credit for the work they have accomplished. I question the fact that had the present amount of work been done by any government it would have cost at least One Hundred Thousand Dollars, and it has all been done by public subscription and volunteer labor. In conclusion, the fishing is fair, the scenery magnificent, and the roads rough.

If Vancouver and other coast cities as well as the towns and cities along the Cariboo Highway could realize what the opening of this highway really meant to them they would wake up and get busy with a helping hand, but like a lot of the rest of Canada in catering to the tourist trade they are not doing their best possibilities but snoring out loud.

KINUSEO FALLS

NEW YORK DOCTOR SAYS HONEY MOST VALUABLE FOOD

Honey is "Nature's own sweet, untouched by human hand," according to Dr. Bogos Beck, writing in his book, "Honey and Health."

"Honey and other simple and natural sugars, like that in dates, figs, raisins, etc., are live physiological agents which contain the germs of life, while industrial sugars are anti-physiological, dead, or, as a matter of fact, murdered sweets," he writes.

Pursuing this line of thought, Dr. Beck deems honey in hot water better than alcohol as a quick pick-up; he says that the ancient Greek athletes wisely used it before entering the arena; that it prolongs life, being responsible for Amaranth's living to the age of 115; Pythagoras to 90, and probably for the long life of Moses and Methuselah, while Thomas Parr, who died in 1835, at the age of 152, was devoted to a honey drink known as methigenin.

It is a good expectorant, according

to Hippocrates; a diuretic, according to the Koran; an aphrodisiac, according to Norman Douglas; an anti-rheumatic, according to Dr. Beck's correspondent, J. Z. de Merion; an anti-diabetic, according to Dr. A. V. Davidov, of Russia; a bactericide, according to Chinese and the Hindus, and a New York State subscriber to the American Bee Journal; it is also an excellent preservative and one of the finest cosmetics. And the date is the only edible substance which surpasses honey in calories.

FARMER WAS SURPRISED AND WHO WOULD BE?

Tempted by a field of ripe corn, a tourist passing through Gilead, Ont., recently stopped and picked a few ears. The farmer, passing a few hours later, was surprised to see an envelope tucked to a fence post. Still more surprised was he when he opened the envelope, and found it contained a dollar bill and a note reading, "Thanks for the corn."

By Arthur Jackson

"The Romance of Sacred Song"

"Now the day is over,
Night is drawing nigh,
Shadows of the evening
Steal across the sky."

This verse always brings back to me a memory of the evening service I attended when a boy. Practically forced to go to church, I attended when a boy, as were most of the boys of my age and generation in that town—I chose the evening service as the least tiresome. Now, scores of years later—strange is human nature—one of my outstanding memories is that very evening service and its most popular hymn, "Now the Day is Over." No matter where I hear this hymn, in church or over the radio, again I look back over the years and see myself in the old church with other boys—most of us the sons of millhands. The seats we occupied were two rows of backed benches placed under a balcony at the west end of the church, where we did not disturb the worship of the older elect and elite members of the congregation in their pews. The altar and chancel of course were in the east end of the church, far away from where we sat. Looking back I know now that we must have been quite a nuisance to many of the occupants of the pews, because to relieve what was often monotonous to us we indulged in all kinds of silly antics which many times resulted in hidden blows—and some not hidden.

But what was tiresome then is a happy memory now, and it is pleasant to recall the bells of the old church ringing "Welcome, you come to Sunday school? Because I have no Sunday clothes!"—doggerel we sang to their chime as we rambled on Sunday afternoons over country paths that led through meadows and along hedge-rows to ponds covered with water-lilies and edged with bulrushes, where perch and other fish lurked unseen, different from the dragon-fishes which flash their fairy wings and brilliant bodies flashing in the sun. A visitor to England would find the features of English countryside is more familiar than the chiming of the church bells.

The old church of my boyhood memories is surrounded by an old burying-ground and many of the tombstones are hundreds of years old. On some of them are quaint inscriptions, but I have forgotten the wording. Enclosing both church and burying-ground is a low stone wall with iron fence on top. The town's market square adjoins this wall on one side and on Saturday, market day, the square, which is quite large, is filled with stalls and is a very busy place. In its centre is an obelisk, about 12 feet high, though to me in boyhood it seemed as high as Cleopatra's Needle does today. Facing the market square on three sides are many stores and three public-houses. The churchyard is the other "The Board Head." As both church gates and taverns were built long before my time, I know not whether their location was by accident or design.

Much of the foregoing was inspired by listening to "The Romance of Sacred Song," a CBC feature heard over CICA Sunday mornings at 11 o'clock. I wonder if there is a romance attached to "Now the Day is Over"? If so, will CBC dramatize it some day?

As I write this, it is again Sunday evening, and the days are almost over, but the scene before me now is totally different one to that of boyhood days in a far-off land. There is no old ivy-covered church, no town with old-fashioned stores, no old farm-houses, nor an old lovers' lane. Everything here made by human hands is comparatively new—town, roads, farm-houses, and churches. As I rambled this afternoon down one side of the creek and back home on the other no imagined calls to Sunday school rang in my ears, no rustled the ripened grain and there was buzz of insect and flight of bird. Everything else was silent. There was no drone of aeroplane and it is yet too early in the year for flights of ducks and geese.

I wonder what the children here will remember when they are old. There is much—very much. Perhaps there is so much that none of it will be outstanding; that the variety is too great to permit of any impression. But I do not think so. It is a privilege of human nature to be able to pick and choose a few scenes of my generation pitying today's youth. That is foolish, for the children of today are to be envied. In the next three score years and ten they will have opportunity to live much fuller life than we of my generation have lived—and we haven't done so badly.

Tonight I listened, as I also did last Sunday night, to "Porta of Call," a CICA presentation at 7:30 sponsored by Alberta Wheat Pool. This is a very interesting and instructive feature, chockful of entertainment, but nevertheless carrying in both geography and history. Anybody listening to good radio programs these days can get a broad education and not know they are getting it. Unfortunately reception of this program was clouded by a heavy rain storm seen south and west. "Porta of Call" is also broadcast over CQPG, at 1:30 p.m. Sunday, a poor time, especially in summer, it seems to me, for such a good feature. It is electrically transcribed.

Following the Wheat Pool broadcast I switched to the 25-meter band and caught Paris-Mondiale, the big French government radio wave station at Paris, coming in quite fair, but with an awfully slow announcer giving news of the day. KDKA's short-wave station in the same band also was on the air, and gave United States front-page news stories.

In this band, too, is BBC's short-wave station, Daventry, and at 8:30 a slight twist of the dial brought in the half-hour chime of Big Ben. (Not the alarm clock one, but the one known on this continent.) Broadcasted, apparently, is unharmed in the old lands and many listeners both in Canada and the United States, find the slower speed tantalizing. However, the return of world news, over BBC, "London

Calling," commencing at 8:30 p.m. and lasting about 20 minutes, is well worth listening to. It is heard quite consistently, winter or summer, in the Peace River country.

I have often thought it would be fine if we here in exchange for the news of the old land BBC sends us, could transmit to the people of the British Isles broadcasts telling them of the beauty and resources of this land, which, by the way, produces some of their bread and bacon.

When this article goes to press it will be September again and as in former years The Tribune will print broadcast programs as space permits during the fall and winter months, commencing with CBC programs over CICA, as follows:

ILLUSTRATED NEWS OF THE WEEK

A SPECIAL TRIBUNE FEATURE
THE BEST OF THE WEEK'S INTERESTING NEWS PICTURES

THE NEW CANADIAN CHAMPION AND THE DETHRONED STAR

One of the most amazing golf championships ever played in Canada was witnessed by thousands at Toronto when Sam Snead, West Virginia power-hitter, defeated Harry Cooper to win the Canadian Open Golf Championship. Snead and Cooper were tied going into the final round and when the day was over they were still even. At the end of a special round of 18 holes the sharpshooters were still tied and it took another nine holes to settle the championship in Snead's favor. Above (left) is Cooper, dethroned champion, and, right Sam Snead, the sub-par golfing champion, with the Seagram Gold Cup in the centre.

DEATH STRIKES AT ELECTRIC LINEMAN

This dramatic picture was taken as the body of Lineman Robert Vaughan was removed from the high tension electric cable where he met his death near Sacramento, California. More than 100,000 volts of current shot through his body, burning him beyond recognition, when he accidentally came in contact with the cable.

QUEEN MARY GREETES THE TWINS

When Queen Mary opened the first block of the new building at Newnham College, Cambridge, she received several purses from children in aid of the building fund. In the picture Her Majesty is happily receiving a gift from twin sisters.

CAMPBELL STILL HOPES TO BEAT HIS OWN SPEEDBOAT RECORD

Sir Malcolm Campbell, the first man to drive an automobile at more than 300 miles an hour, is now an enthusiastic speedboat driver. Above he is shown with his new speedboat "Bluebird" on Lake Geneva as he prepared to beat his own world's speedboat record. So far adverse weather and a large accumulation of weeds on the lake have delayed the record-breaking attempt. Unlike Campbell's previous boat and Gar Wood's speedboats, the new Bluebird has seating capacity for the driver only.

LATEST CINEMATIC CINDERELLA

Here is 19-year-old Ann Miller, noted dancer and comedienne, who, although she only made her picture debut last year, now finds herself cast in one of the most sought after roles in Hollywood this season. After Capra-approved screen tests, she was selected for the part of "Essie," one of the leading roles in Columbia's picturization of the Kaufman-Hart Pulitzer prize-winning play, "You Can't Take It With You," which Capra has just completed. Miss Miller was dancing in a San Francisco night club when she was "discovered." Her first picture was "New Faces of 1937." Then followed feature roles in "Stage Door," "Radio City Revels" and "Having A Wonderful Time."

PRINCIPALS IN MYSTERY SHOOTING

Charles E. McDonald (left) is pictured as he was questioned by Hollywood police in the shooting of Mrs. Emilia Krueger (right, in hospital), wealthy wife of the conductor of the Chicago Philharmonic Orchestra. Police say Mrs. Krueger, member of the Chicago McCormick family, told them McDonald blamed her for his marital troubles. Mrs. McDonald, 22, employed by the Kruegers as maid, is pictured (bottom left) waiting to be questioned.

DISTINGUISHED VISITOR

Sir John Pratt, K.B.E., C.M.G., photographed at Montreal while en route to Sydney, Australia, to attend the second British Commonwealth Relations Conference. Sir John is a brother of Boris Karloff, screen menace No. 1, and the remarkable resemblance often leads to mistaken identity.

SAYS EUROPEAN POLITICS

Professor Ernest Barker, professor of political science at Cambridge University, is seen above as he arrived in Canada. The Cambridge professor described European politics as a game of bluff and thought no European countries could afford a large-scale war.

WHEN "KING" CARL LEFT FOR TREATMENT

Carl Hubbell, ace pitcher for the New York Giants, is attended by a stewardess as he left New York by plane for Memphis, Tenn., to be treated by Dr. Spencer Speed for a supposedly dead arm. Carl is resting the valuable flipper on the arm of the chair.

The Man Who Protested That the Lady Was Taking Up Too Much Room in the Carriage.
—Marc Aurelio, Rome.

THE NEW GERMAN CHURCH

"And as penance, you will say three times 'Our Fuhrer's' every night, and read Mein Kampf ten times."
—Le Canard Enchaîné, Paris.

SPANISH WAR FACTIONS MAY CONFER

The European press is greatly interested in the simultaneous appearance in Zurich, Switzerland, of Premier Negrin (left) of the Spanish Loyalist government, and the Duke of Alba, Spanish insurgent representative in London (right). Some newspaper reports claimed the representatives of the two warring factions had held a secret conference, but this could not be confirmed.

P. J. Tooley left by car on Friday on a business trip to Edmonton.

The Presbytery of Peace River will meet in Brownvale Tuesday, September 6, at 3 p.m.

Mrs. Cowdry and son, Jack, of Vancouver are visiting Major Ramsay.

Walter Durda, who has been working near Edmonton all summer, returned home last Friday.

"Dad" Robideau of the East End was in the Tribune office on Friday. "Dad" is looking in the pink of condition.

A. A. Pickney, representing Manufacturers Agents of Edmonton, is a business visitor here from Grande Prairie registered at the Donald Hotel.

Fred Howlett, teacher at Big Horn school, and nephew, Elwin Howlett, and Miss Edith Hythe were visitors in Grande Prairie on Wednesday.

W. M. Carver of Saskatoon is visiting his son and daughter-in-law, Dr. D. O. and Mrs. Carroll. This is his first visit to the city since his annual trip to Grande Prairie. He is a retired roadmaster of the C.N.R.

Junius Aken and Harcourt Perry left last week, the former for Spokane, where he is visiting with his sister, Marjorie. Later he plans on staying with sister Virginia, in Washington, where he will attend school. Harcourt is in Calgary.

Wedding Bells

FORMER GRANDE PRAIRIE GIRL WED AT COAST CITY

A quiet but pretty wedding was solemnized at 4 o'clock Tuesday afternoon in St. Peter's Church rectory, Nanaimo, when the Rev. Father Lewis, who is in charge of the matrimony Miss Beatrice Loretta Clark and Dr. Anthony Verchere, both of Port Alberni.

The bride is the daughter of Mr. and Mrs. Charles Burton Clark of Ontario, and the groom is the son of Mrs. Arthur Verchere, Vancouver, and the late Arthur Verchere, Ladysmith. The groom is a dentist of the West Coast city and the bride is a former member of the staff of the West Coast Hospital, Port Alberni.

Attending the couple were Miss Beatrice Lillian Clark, Port Alberni, sister of the bride, and Mr. S. W. Good, Duncan.

The happy couple left on the evening boat for Vancouver for a honeymoon trip to the mainland. On their return they will reside in Alberni—Ladysmith Chronicle.

Miss Clark was employed in the office of the Municipal District of Bear Lake and both Miss Clark and Beatrice are well known in Grande Prairie.

This Week's Recipe

PEACH DELICACIES

In view of the abundant crop of peaches this season, the following recipes for home canning of this fruit may prove useful:

18 Peaches. 2 Oranges. Sugar.

Peel and stone the peaches. Remove seeds from oranges and put through a food chopper. Mash all together, weigh and allow an equal amount of sugar. First cook the fruit until tender in a small amount of water, then add heated sugar and stir until thick. Pour into hot sterilized glasses. Cool, seal with paraffin wax, and store.

12 Peaches. 3 Oranges. 1 Cantaloupe.

Peel and stone the peaches. Peel oranges and remove skin from the melon. Slice fruit finely. Add weight and add an equal quantity of sugar. Boil quickly until thick. Seal and store.

12 Peaches. 3 Oranges. 1 Cantaloupe.

Use equal parts of apples and peaches diced. If the apples are a good color, do not peel. Add three-fourths as much sugar as fruit. Cook the mixture slowly until it is thick and clear. Seal in sterilized jars. Equal parts of rhubarb, peaches and apples may be used.

12 Peaches. 3 Oranges. 1 Cantaloupe.

Use equal parts of apples and peaches diced. If the apples are a good color, do not peel. Add three-fourths as much sugar as fruit. Cook the mixture slowly until it is thick and clear. Seal in sterilized jars. Equal parts of rhubarb, peaches and apples may be used.

At the 19th Hole

A record attendance was on hand at Richmond Hill golf course on Sunday last. Over sixty cars were parked near the clubhouse during the afternoon. The weather was ideal for golf, with just enough wind to keep golfers cool.

The Men's Club Championship Tournament games were run off to the final of the championship flight, and the other flights played to the semi-finals and finals.

The game between C. G. Butchart and Larry Cobb to see who would play off in the final of the Men's Club Championship proved to be a battle to the finish. The match was a five-hole putt for a par, and Butchart missed a three-footer to tie, giving Cobb the match.

Cobb was off his game in the first five holes, Butchart winning 1, 3, 4 and 5, halving the second with five. Cobb won the 7th and 9th, halving the 8th, making Butchart 2 up at the end of the 9th.

In the second round Butchart only won one hole, the 3rd, Cobb taking 2, 5, 7 and 9. The order:

First Round
Cobb 554 565 455-45
Butchart 559 455 556-44

Second Round
Cobb 544 444 545-39
Butchart 552 444 646-42

The match between Len Duffield and Harry Archibald in the fourth ended in a win for Duffield, 4 and 3. Duffield turned in a 39 in the first nine holes.

In the final brackets of the first flight are S. Smith and R. Roddick. Second flight finalists are T. Newton and B. Emerson.

Third flight is still playing to the fours.

A. E. Galloway and E. Gammon, in the second flight of the Men's Club Championship, had long been in a battle, going to the 22nd hole before a decision was made, the latter winning by a stroke at the fourth green.

There was a very poor showing in the Ladies Club Tournament for the Herman Treile Cup, only half of the draw being played off.

The following are the results of matches played: Mrs. W. R. Roberts won from Mrs. R. H. Wether; Mrs. J. Donaldson won from Mrs. Frank Donaldson; Mrs. Borwick won from Mrs. Treile; Mrs. H. Archibald won from Mrs. P. Powers; Mrs. G. Neilson won from Mrs. W. Edgar; Mrs.

M.P.H.A. Broadcast Over CFGP For This Week

(Read by Jerry White, pinch-hitting for Art M. Smith.)

Hello, boys and girls. Tomorrow many of you are off to school for another year. Practically all of you are in new grades, have new subjects and new teachers. You have been through the past year. What are you going to do when you finish your school? Begin right now plan for that time.

As you are off to school tomorrow, another young man, Charlie, is leaving on a trip of great adventure. Charlie Stojan of Grande Prairie is leaving Vancouver by car through the Monksman Pass, to assist us in proving to the world that our scheme for an outlet through Monksman is feasible. Now, Charlie can't do this alone. But he has shown a splendid spirit by coming along and offering to make this trip and donate the use of his car.

We need your help more than ever now. We are doing this for you. Mr. Monksman has been very kind and said, "It is the younger generation that will benefit most from this highway and it is up to you, boys and girls; it is your road, so help us."

We are going to school in the whole Peace River plan immediately to put something on to financially support the Monksman Pass Highway. Whether you are going to a new school this term or if you have a new teacher, or if you are in the same school, it is up to you, boys and girls; it is your road, so help us.

On Wednesday evening Mrs. C. C. Fleming, the devoted wife of the late Challenge Button, died at her home. The game was keenly contested and finished with both players turning in cards of 55. The tie will be played off at a later date.

Pro. "Sandy" Stevenson up to date has received forty entries for the Peace River District Open Golf Championship, to be played at Dawson Creek. All those interested in the play and have not made their entries should get in touch with "Sandy," as the draw will be made Saturday evening. Arrangements have been made for those not able to get there Saturday to have the draw noted in the window of Bell-Fleming Hardware, giving you who play and the minutes late, game will be defaulted.

Francis Donald and Geo. Duncan challenged Larry Cobb and "Clay" Butchart to a match after their game in the fours. After sixteen holes of play there was only one point difference in favor of the latter couple.

In a match between C. C. Fleming and George Little, Little won 4 and 5, halving the second with five. Cobb won the 7th and 9th, halving the 8th, making Butchart 2 up at the end of the 9th.

In the second round Butchart only won one hole, the 3rd, Cobb taking 2, 5, 7 and 9. The order:

First Round
Cobb 554 565 455-45
Butchart 559 455 556-44

Second Round
Cobb 544 444 545-39
Butchart 552 444 646-42

The match between Len Duffield and Harry Archibald in the fourth ended in a win for Duffield, 4 and 3. Duffield turned in a 39 in the first nine holes.

In the final brackets of the first flight are S. Smith and R. Roddick. Second flight finalists are T. Newton and B. Emerson.

Third flight is still playing to the fours.

A. E. Galloway and E. Gammon, in the second flight of the Men's Club Championship, had long been in a battle, going to the 22nd hole before a decision was made, the latter winning by a stroke at the fourth green.

There was a very poor showing in the Ladies Club Tournament for the Herman Treile Cup, only half of the draw being played off.

The following are the results of matches played: Mrs. W. R. Roberts won from Mrs. R. H. Wether; Mrs. J. Donaldson won from Mrs. Frank Donaldson; Mrs. Borwick won from Mrs. Treile; Mrs. H. Archibald won from Mrs. P. Powers; Mrs. G. Neilson won from Mrs. W. Edgar; Mrs.
